## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in—  
(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or  
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claim 25 is rejected under 35 U.S.C. 102(e) as being anticipated by Yoneno (US 6317118).

Yoneno teaches in figure 1 an image display system for displaying an image on a screen (7) in response to a position of a pointer (3). The system includes a projection-type image display means (projector 4) a detector means (which is a detector unit as claimed by applicant in applicant's claim 25, specifically a camera 5) for detecting coordinates responsive to the position of the pointer (5). A signal from the pointer is received by a receiver (11). Using the positional data and signal data from the pointer the computer 10 displays an image (such as an arrow or cursor) on the screen at a position that is predetermined based on the pointer's (5) position, which is not necessarily immediately in front of the pointer. Since the receiver (11) and camera (5) are positioned below and above the edge of the screen respectively, it is inherent that the detection area of both is larger than a display image area.

***Allowable Subject Matter***

3. Claims 1-24 and 26 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

Independent claims 1,9,17,18 have been amended in such a way that the Yoneno reference cited in the non-final office action mailed on July 2, 2002 no longer reads on them, as is explained by the applicant in applicants Amdt. A received on November 4, 2002. It would not have been obvious to one of ordinary skill in the art at the time the invention was made to modify Yoneno to include having the image displayed selectively either at the first position coordinates or at second position coordinates. Since the prior art does not teach, nor would it be obvious to modify the prior art so that it does teach the image being displayed selectively either at the first position coordinates or at second position coordinates, claims 1, 9, 17, and 18 are allowed. Claims 2-8, 10-16 depend on claims 1 and 9 respectively and are therefore also allowed.

Independent claims 19, 22, 24, and 26 have been amended in such a way as to remove the objection cited in the non-final office action mailed on July 2, 20002 and are therefore allowed for the reasons given in that rejection.

***Response to Arguments***

5. Applicant's arguments filed November 4, 2002 have been fully considered but they are not persuasive.

Applicant states in the arguments that claim 25 has been amended in the same way claims 1, 9, 17, and 18 had been. However claim 25 is labeled as "(Not Amended)" in

Art Unit: 2851

Amendment A and contains no amendments. Therefore applicant's argument is not persuasive since the changes have not been made.

*Conclusion*

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew T Sever whose telephone number is 703-305-4036. The examiner can normally be reached M-Th 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Russell Adams can be reached at 703-308-2847. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9318 for regular communications and 703-872-9319 for After Final communications.

Art Unit: 2851

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
